URGES MINISTRY TO BROADEN RANGE OF PRODUCTS -- Leningradskaya Pravda, No 79, 2 Apr 50

Since it is expensive for individual plants to produce the instruments required for their work, and since these items do not always fulfill the technical requirements, the Ministry of Machine and Instrument Building should increase the variety of types of items which are in heavy demand, such as X-ray apparatus, steeloscopes, spectrographs, and spare parts for them. The building of a basic plant to construct sample models of equipment for testing purposes in filling special orders should also be considered.
